## HAUL ROAD TRANSPORT

BEALL PETROLEUM

**SEVERE SERVICE**

This Beall custom-design was created for hauling fuel in the harsh conditions of the Arctic Circle and beyond on roads not meant for ordinary equipment. After researching the Alaskan Haul Road demands, we incorporated features that would make this design the Haul Road trailer to have. From the low-profile design to the well protected air and electrical lines, this trailer is well thought out. Contact Beall Corp next time you are looking for a trailer to do an extraordinary job.
