

DOT 407 SS

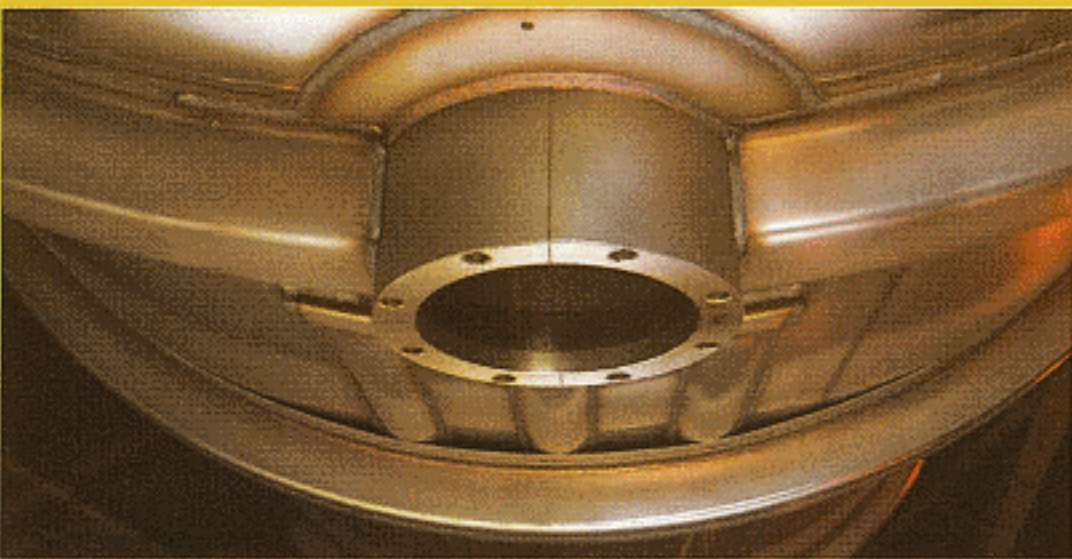

STRAIGHT ROUND INSULATED TANK TRAILER

Brenner chemical tanks have an impressive record for reliability that's been proven over more than four decades. This uncompromising standard for performance has earned Brenner a leadership position in the stainless steel tank market.

SEAM WELDING

Brenner's CNC plasma seam welders reduce heat-affected zones, improving corrosion resistance.

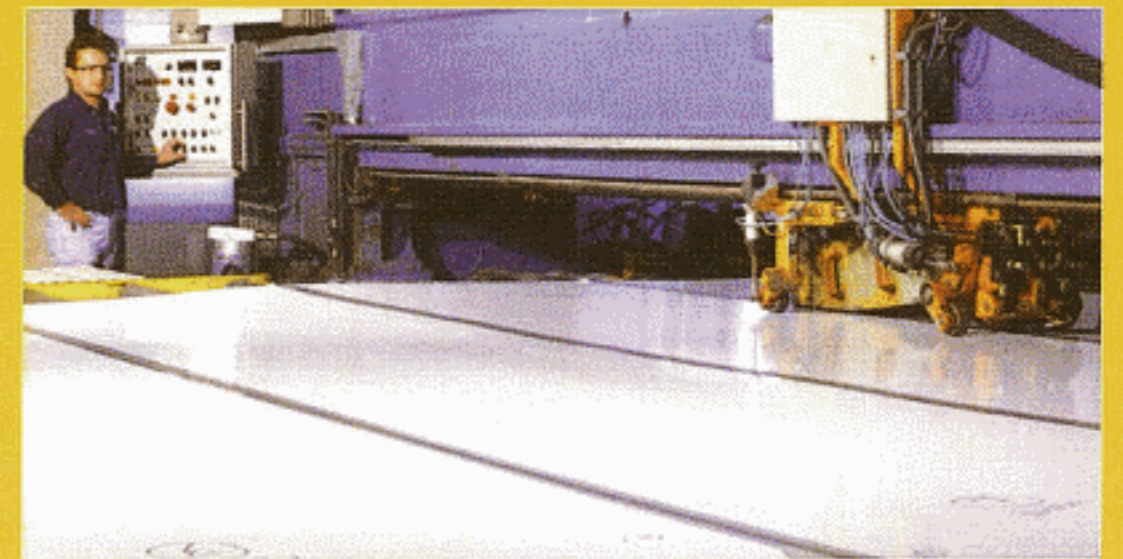

SUMP

Brenner's integral sump affords 100% drainage for both pump and gravity discharge.

AUTOMATED MANIPULATOR WELDING

All rings and heat panels are welded off automatically for optimum durability. Brenner channel heat panels are the industry benchmark for heat transfer performance and strength.

PLANISHING

Brenner's unparalleled experience in planishing vessel seams ensures your tanks will have finished thicknesses well above DOT minimums.

DOT 407 SS

DOUBLE CONICAL INSULATED TANK TRAILER

Brenner has produced a variety of DOT 407 tanks, many with unique features developed to meet specific customer requirements.

FIT-UP

Tank heads are made in-house, one at a time, to ensure a close tolerance circumferential fit, yielding extended tank life.

BALCONY LADDER

Brenner's attention to overall product performance includes details like this balcony ladder to address specific fleet objectives.

SUSPENSION

Brenner Tank and our manufacturing partners utilize vigorous testing to ensure our chassis yield the best possible reliability.
